

WL Hybrid Firewall™

Safe hydration at home for you
and your loved ones

The world's most highly
certified drinking water purifiers

Bring back good water

The problem is not our water. It's how our water is delivered.

Chemicals added, organic matter and other contaminants.

Our mission is to return water to its natural, perfect state.

That's what Waterlogic purifiers are for... just perfect water.

Bottled

Our water should not cost the earth. There is massive pollution and cost in bottling, transporting and disposing of plastic bottles. They are stored for weeks, giving the chemicals a chance to leach into the water.

And of course, once the bottle is open, the water is susceptible to all kinds of external contamination.

Tap

How many miles of pipe does your water travel through before it gets to your tap? Every meter is a chance for contamination, which is why tap water has chlorine added, to prevent microbial growth. Unfortunately it also badly affects the taste and smell.

Filtered

Even the best filters cannot remove all bacteria. They adsorb chlorine, which improves the taste but removes protection against bacteria. So it might taste OK, but it will still be contaminated.

What you need is a flawless choice

In over 25 years of developing water solutions, we've learned there are two things to avoid when dealing with water. Contamination and storage.

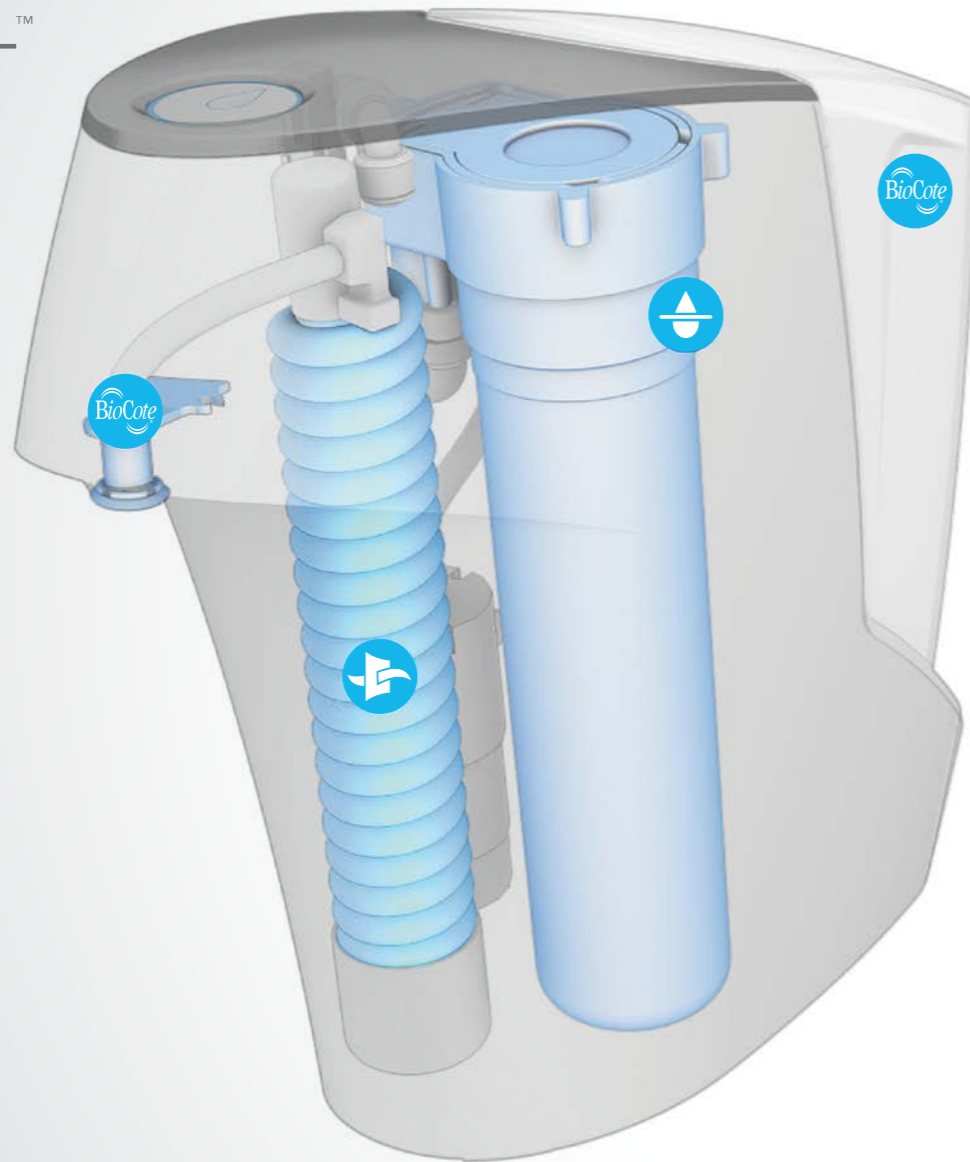

Contamination is all around us, so any good water product must provide protection against sources of bacteria and chemicals.

Storage simply gives contaminants the time they need to spoil the water.

So we designed a system that purifies the water the instant you need it and at the heart of that system is Firewall™ technology designed for thorough and effective purification.

FIREWALL™

At the heart of our water purifiers is the patented Firewall™ technology.

Our 3 stage system filters, purifies and protects.

First, we use high-performance active carbon filter. This adsorbs chlorine, microbes and other contaminants, such as lead.

Then the water passes through a double-helix quartz spiral, where it is exposed to a germicidal UVC light, which is able to destroy all pathogens present in the water, all the way through to the nozzle. This means even the smallest, toughest microorganisms are destroyed, making it up to 99.9999% bacteria free.

An extra layer of protection is guaranteed by BioCote® antimicrobial technology. The water reservoir and the dispensing nozzle are infused with BioCote® a silver ion additive able to inhibit microbial growth on the surface of the products helping to reduce unpleasant odors and stains and degradation of key surfaces.

All of this happens in an instant, so the water you drink is freshly purified every time.

Firewall™ means safely purified
Freshly purified, with up to 99.9999% of bacteria removed but with the healthy minerals left in. It's how great water should be.

Firewall™ means the best taste
Water doesn't taste of anything... right? Try the Waterlogic taste test and you will be amazed at how good purified water tastes.

Firewall™ means less waste
No plastic bottles and minimal maintenance. Only one filter and lamp change per year and low power consumption.

WL Hybrid Firewall

Fresh, safely purified & flexible

Fill

Plug in. Detach the reservoir and fill it in with up to 1.5 litres of fresh tap water.

Dispense

One touch and the WL Hybrid Firewall™ purifies all the water you need, when you need it.

Drink freshly purified

Enjoy the best tasting and purest water. Removes almost all chlorine, contaminants and bacteria leaving in all the essential minerals for healthy hydration.

The unique design requires no installation. As narrow as a kettle and only needing a power supply means you can use it anywhere: in the kitchen, office, lounge. You choose.

The world's most highly certified drinking water purifier

Firewall™ technology found in all Waterlogic home purifiers has the highest level of accreditation from IAPMO R&T. No other drinking water purifier has the same guarantee of purity.

Features & benefits

Low power consumption

Average 0.07 kW/h for standard use.

Bottle height nozzle

Designed to fill average size reusable bottles and cooking pans.

Easy maintenance

Long life filter and lamp only need one change per year*. Monitor LED system alerts you when you need to replace your Firewall™ lamp and filter cartridge.

* Depending on quality of incoming water

Cool

For a fresh taste, put the easy-detachable reservoir in the fridge tray, or drop some ice cubes into it, just before dispensing.

Product specifications

Purification technology	Firewall™ UVC purification technology
Water options	Ambient
Installation type	Plug & go
Power: typical usage	32 Watts / 120 Volts / 0.27Amps
Dimensions	140 mm/5.5" (W) x 306 mm/12.1" (H)
Weight	3.6 Kg/7.9 lbs
Maintenance	Annual <small>Depending on local water conditions</small>
Filtration technology	1 micron activated carbon with lead reduction
Reservoir capacity	1.5 litres (~0.43 gal.)
Guarantee	12 months

WL Hybrid Firewall™ is certified by IAPMO R&T according to NSF/ANSI 42 for chlorine, taste and odor reduction, NSF/ANSI 53 for lead and cyst reduction, 55 Class A, and P231 & US EPA Guide Standard for bacteria, virus and cyst reduction.

Waterlogic guarantee

Quality

We've been designing and making our own water cooling and purifying equipment for over 25 years. In that time we've become leaders at making and supplying the highest quality water solutions for businesses. Now we're bringing our advanced technology to your home, so you and your family can benefit from the best water possible.

Problems

If our unit develops any fault, we will solve the problem. We promise to replace any faulty parts free of charge, within the first 12 months of your ownership.

Advice

Our water experts are here to discuss any water related issue. With extensive knowledge of microbiology and water treatment, we might be just what you need.

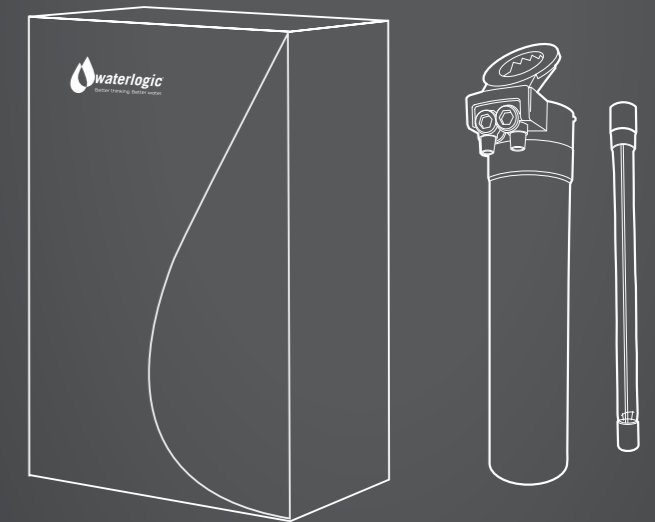

Accessories

Maintenance

All Waterlogic products are designed for low maintenance and easy use. The smart control panel informs you when it's time to refresh your Firewall™ technology.

Replacement Firewall™ Kit

High performance carbon filter and long-lasting UVC lamp for Firewall™ system.

Better thinking, better water, better for you, better for the planet.

At Waterlogic, everything starts with the way we think about water. Behind every drop of Waterlogic water are years of knowledge, innovation and experience to deliver pure, great-tasting water in the most sustainable way.

And because we design, manufacture, distribute, install and service our own water dispensers, you can enjoy unparalleled product quality.

For the first time now, you can choose to drink purified, quality water in your home.

Reassuringly certified

We are proud to have achieved the high standards set by many respected international agencies. These certificates offer peace of mind and assure the performance of our flawless water systems.
